Full-stack engineer, former CTO and entrepreneur with 15+ years of experience in software architecture, technical leadership and product development. Founder of Heatscoring PRO and Synaptra Labs, combining hands-on engineering, SaaS development and practical AI consulting. Academic background in Astrophysics and Artificial Intelligence.

15+	Years building software
3	Companies founded
2	MSc degrees

EXPERIENCE

Founder & AI Consultant
2025 – Present

Synaptra Labs

- Founded an AI consultancy supporting small businesses and independent developers
- Analyzed business workflows to identify practical AI applications and cost-saving opportunities
- Designed and prototyped RAG systems, AI agents and automated business workflows
- Set up and optimized AI development tooling, integrations and operating costs

Tech: Python, TypeScript, React, Node.js, OpenAI, Claude, Vertex AI, Vercel

Founder & Lead Engineer
2025 – Present

Heatscoring PRO

- Founded a white-label competition SaaS used by leading World and European tours
- Customer acquisition; led commercial negotiations, pricing, onboarding and client relationships
- Designed a revenue model combining event licensing, registration fees, maintenance and custom development
- Built real-time scoring and broadcast feeds, load-tested for large numbers of concurrent subscribers
- Engineered offline-first judging, concurrency-safe scoring and automated heat transitions
- Developed scoring for five disciplines, elimination brackets, rankings and secure tenant integrations
- Integrated Stripe Connect payments and automated releases across five deployment environments

Tech: Next.js, React, TypeScript, tRPC, PostgreSQL, Prisma, Supabase, IndexedDB, Clerk, Stripe Connect, Vercel, Playwright

Chief Technology Officer
2020 – 2025

Codeversity · Vienna, Austria

- Led engineering teams, mentoring developers and establishing technical standards
- Defined technology strategy, architecture and product development priorities
- Managed engineering budgets, resources and project delivery
- Drove technical innovation and aligned development with business objectives

Tech: React, TypeScript, JavaScript, GraphQL, Node.js, AWS, Dgraph, Jira, Bitbucket, GitLab, Auth0, JoT

Founder/CEO
2012 – Present

Webleaders · Vienna, Austria

- Founded and managed a software development and consulting business
- Led client acquisition, commercial relationships and project delivery
- Developed custom web applications and scalable software solutions

Tech: TypeScript, React, Next.js, Node.js, PHP, Python, PostgreSQL, Docker, AWS, Vercel

Technical Lead & Competition Judge
2017 – Present

Freestyle Pro Tour

- Developed and maintained live-scoring software and competition tools
- Led technical operations and supported professional windsurfing events
- Managed judging workflows, competition formats and event operations
- Improved application performance and software delivery processes

Tech: PHP, WordPress, Preact, React, Docker, TypeScript, JavaScript, GitHub, GraphQL, REST, JoT, Bun

Senior Full-Stack Developer (Contract)

2020 – 2022

Kalbeck Digital · Vienna, Austria

- Developed and integrated full-stack web applications
- Provided architecture consulting, code reviews and technical guidance

Tech: TypeScript, JavaScript, Node.js, PHP, WordPress, GraphQL

Researcher/Lecturer

2013 – 2020

University of Vienna · Vienna, Austria

- Conducted computational astrophysics research on primordial atmospheres and protostellar disks
- Developed numerical simulations and scientific software
- Lectured Theoretical Astrophysics, Mathematical & Physical Methods in Astrophysics and Numerical Models
- Supervised BSc and MSc students with their theses
- Published scientific research findings

Tech: Fortran, Python, Node.js, PHP, LaTeX, Mathematica, Bash

Centre Manager & Head of IT

2005 – 2019

Kefalos Windsurfing & Sailing · Kefalos, Greece

- Managed centre operations, staffing and financial planning
- Developed customer relationships and drove business development
- Built and maintained the company website and online booking system

Tech: PHP, WordPress, Google Ads, SEO

SKILLS

AI & LLMs
OpenAI, Claude, Vertex AI, RAG Systems, AI Agents, Workflow Automation, NLP, Computer Vision, Neural Networks (CNN, RNN)

Frontend
React, Next.js, TypeScript, JavaScript, Preact, IndexedDB

Backend & Data
Node.js, tRPC, GraphQL, REST, PostgreSQL, Prisma, Supabase, Stripe Connect

Cloud & DevOps
AWS, Vercel, Docker, CI/CD, Playwright

Leadership & Product
System Architecture, Team Leadership, Mentoring, Technology Strategy, Product Strategy, Agile Methodologies

Scientific Computing
Fortran, Python, Numerical Simulation, Mathematica, LaTeX, Bash

Also worked with
Go, Rust, C, C++, SQL, MySQL, HTML, CSS, SASS, Relay, Dgraph, Webpack, Git, GitHub, GitLab, Bitbucket, Jira, Auth0, Linux, macOS

EDUCATION

Master of Science in Artificial Intelligence

2024 – 2025

IU International University of Applied Sciences, Munich, Germany

Focus on NLP and Computer Vision. Special focus on Visual Question Answering Systems.

Master of Science in Astronomy and Astrophysics

2011 – 2013

University of Vienna, Vienna, Austria

High Energy Astrophysics, Modeling Primordial Atmospheres & Protostellar Disks.

Bachelor of Science in Astronomy and Astrophysics

2008 – 2011

University of Vienna, Vienna, Austria

Computational Science. Focus on Celestial Mechanics.

Studies in Mechanical Engineering · Technical University of Vienna, Vienna, Austria — 2007

Studies in Mechanical Engineering · Technical University of Munich, Munich, Germany — 2003
